MISSION

Transforming Complexity into Capability

AMCF advances digital transformation through data-centric and edge-enabled technologies that support real-time decision-making, automation, and resilience. In healthcare and other mission-critical domains, we operationalize technology and artificial intelligence as strategic assets — delivering measurable, secure, and sustainable enterprise outcomes.

CORE CAPABILITIES

Cybersecurity & GRC
Zero Trust architectures, governance, risk & compliance aligned with CMMC, NIST, and federal frameworks.

AI & Data Analytics
AI-driven analytics, machine learning integration, and data pipelines for mission-critical decisions.

Cloud & Hybrid Infrastructure
Secure cloud architecture, hybrid environment design, and enterprise IT modernization.

Healthcare Technology
Health IT solutions, clinical systems integration, and VA-aligned digital health transformation.

Operations & Automation
End-to-end automation integration, software infrastructure, and high-performance network architecture.

Training & Workforce Dev
Cybersecurity, AI, and CMMC compliance training — from C-Suite to technical practitioners.

WHY AMCF

- Veteran-informed mission alignment — deeply attuned to VA objectives and the needs of those we serve.
- End-to-end delivery across assessment, design, engineering, and operations with no handoff gaps.
- AI-native approach integrating analytics and automation at every layer of the enterprise stack.
- Federal GRC expertise aligned with CMMC, NIST 800-171, Zero Trust, and evolving threat landscapes.
